

Two typefaces, kept.

Kept Sans for the interface. Numen Title for the headlines.

And Legibility Sans, built only to be read. Free forever.

Kept keeps what matters.

Light • The quiet hour begins at 6:30

Regular • The quiet hour begins at 6:30

SemiBold • The quiet hour begins at 6:30

ExtraBold • The quiet hour begins at 6:30

opsz 52 • SOFT
75

The optical knee, softened

Display presence that refuses to shatter. Soft serifs measured two points better under degradation, and they read warm rather than starched.

✓ X •

The family marks

A native check and cross from the face's own stem logic, and the interpunct grown 20 percent, because "•" is how Kept speaks.

Kept & 0123

Its own ampersand, cap-height figures

Fraunces' ampersand stays; replacing it would be vandalism. Lining figures sit at cap height, built for headlines with numbers in them.

95% × 102%

Instrument's stance

Condensed five percent, two percent taller. Costs half a point of accuracy, buys the editorial posture the old headliner had.

Illinois 011l

Letters that stay strangers

A tail on the l, serifs on the I, room around the narrow letters. Codes at a glance went from 52.9 to 82.3 percent.

x-height +6%

A taller lowercase

Ascenders now rise past the caps, the way text faces have done for centuries. Worth five points at nine pixels alone.

kept ✓

The t that finishes

The outstroke ends in the flick of a completed checkmark. At thirteen pixels it disappears. Brand, not benchmark, and priced in.

0 ≠ Ø

The slash we rejected

A slashed zero tested worse; the reader kept calling it an eight. We kept the oval and published the failed experiment.

kept
✓

Built to be read. Nothing else.

Regular · The quiet hour begins at 6:30

SemiBold · The quiet hour begins at 6:30

Bold · The quiet hour begins at 6:30

8 px

The only face that holds the line

92% at eight pixels against a 90% criterion, over the line in 6 of 8 runs. Verdana reads 88 and clears it in 3 of 8. The margin is in the runs, published.

I l 1 0 O

Letters that answer for themselves

The Braille Institute's disambiguation, kept whole: serified I, tailed l, flagged 1, slashed 0. We raised the x-height ten percent and gave the narrow letters room.

fi ≠ fi

No ligatures, on purpose

Every letter stands alone. Nothing decorative was added, no brand marks, no flourishes. The control group, made shippable.

✓ holdout

It did not learn the test

Designed against our own public benchmark, so a holdout corpus it never saw was run once at the end. Its best blur score came on words it had never seen.

The Kept Legibility Index, protocol v3.1: twenty-four typefaces, twelve degraded conditions, eight repetitions per cell, a size-threshold sweep, a crowding cell, and a holdout corpus.

Differences under a point are ties. Full method and raw data: kept.do/most-legible-font ·

github.com/JessieSalas/kept-legibility-index.

Free, as in kept.

Both families are licensed under the **SIL Open Font License 1.1**, the license their source families gave us. Use them, embed them, subset them, fork them. Derivatives stay open.

Kept Sans is built on Figtree, © 2022 The Figtree Project Authors, with K, k, and the ampersand from Albert Sans, © 2021 The Albert Sans Project Authors. **Numen Title** is built on Fraunces, © 2020 The Fraunces Project Authors, Undercase Type.

Legibility Sans is based on Atkinson Hyperlegible Next, © 2020-2024 Braille Institute of America (Atkinson Hyperlegible is their trademark; our derivative is independent and not endorsed). Instrument Serif, by Rodrigo Fuenzalida and Jordan Egstad, still sets the mantra inside Kept, where it belongs.
